Education

UPM — **2020-09-01 - 2024-07-01**
8.4. 8 Honors. — Software Engineering

Relevant Experience

6 year experience using Python and Java for backend system development, and Javascript/NodeJS for the development of frontend and backend systems.

2-year experience in development of Machine Learning projects, including regression, classification and generative models, having worked with frameworks such as Tensorflow or Keras.

Knowledge of design, development and queries of relational atabases using SQL as much as noSQL with MongoDB.

System design on C and Rust having developed software for embedded systems and emulators of legacy systems.

Experience in development on Agile methodologies, including Scrum and Kanban.

Projects

I have a list of personal projects on my Github and webpage. I love to keep learning and as such, I like to develop projects of multiple areas and technologies (frontend, backend, system programming, system emulators, ML models) when I have free time.

Awards

Data4Health Datathon Madrid 2023 — **2023-12-05**
Dedalus

Construction of a Machine Learning Model with the objective of predicting ICU stay time. 2nd prize.

Excelence Award for Universitary Studies — **2023-01-04**
Community of Madrid

Certifications

Introduction to Big Data through Apache Spark
UPM

English CEFR B2

JLPT N1

Japanese Language Proficiency Test. Equivalent to CEFR C2.
